Rolling resistance:
Classes from G (lowest efficiency) to A (highest efficiency)
The fuel savings largely depends on the vehicle and the driving conditions.

Wet grip:
Classes from F (worst efficiency) to E (best efficiency)
The fuel savings largely depends on the vehicle and the driving conditions.

Noise emission:
Value of external rolling noise* of the tyre in decibels
The degree of effectiveness largely depends on the vehicle and the driving conditions.

*The external rolling noise of the tyre does not always correlate to the noise inside the vehicle.
